

Volunteers Needed for Cancer and Hearing Loss Research

What is the study about?

We are investigating how platinum-based chemotherapy drugs may cause hearing loss

Hearing loss can contribute to:

- Worse brain function
- Social withdrawal
- Increased dementia risk

Why is this important?

- Hearing loss is not routinely screened for after chemotherapy
- Your participation could inform future screening and support services

Scan here to sign up!

Who can take part?

- Patients set to receive platinum-based chemotherapy
- 18 years old +
- Willing to take part in online hearing and brain tests

What is involved?

- Three online hearing and brain tests during chemotherapy treatment
- Questionnaires about your health and lifestyle
